VISUALIZE

FRAMESHOP™ SOFTWARE SUITE

WIZARD
The "Original" CNC!

Visualize™ is a component of our FrameShop™ software suite that was designed to help bring your ideas to life—*virtually*. Visualize™ software, combined with a high-quality digital camera and one of our camera mounts, enables you to develop your design ideas and show your customers a virtual preview of their matted and framed artwork—right from your sales counter!

Easily save finished compositions as high quality JPEG image files that you can email to customers, post to social media, or incorporate into a presentation. Visualize makes it easy to quickly compare multiple options, upsell every job, and ultimately close more sales. FrameShop Visualize software is compatible with Wizard computerized mat cutters, and can also be used as a standalone solution.
